

Solve the Enterprise Label Printing Puzzle

BarTender Fits in with your Clients' Other Software

Successful barcode and label printing requires more than just fast, easy-to-use label software. Your clients need software that works reliably with supply chain management programs for manufacturing, shipping, warehousing and other functions. Fortunately, BarTender provides industry-leading capabilities for integrating label production into existing business operations. This includes direct access to a huge variety of databases,

including SAP and Oracle, and full support for RFID "Smart Labels." And it's easy to control BarTender from other software. Methods include ActiveX Automation, file and e-mail "triggers," and XML command script. Or, printer code "templates" can be exported from BarTender and the label data "merged" in later by other software. See for yourself how well BarTender completes your enterprise label printing picture.
